Mike ROSS

Journal of Educational Sciences Research is intent peer-reviewed Open-Access Journal, aims to publish scholarly work and reliable source of information from the recent outcomes. Journal of Educational Sciences Research publishes Research, Review, Short Commentaries, Case Reports, Mini-Review, etc. in all areas of Educational Sciences.

Educational Sciences or Theoretical practices have the utmost impact in carry forwarding the training, curriculum and educational policies for the future references. The Journal of Educational Sciences Research has a wide research scope and deals in all the areas of the Quantitative, Qualitative, mixed patterned, and original conceptual analysis on educational sciences, teaching and field education.

Our journal successfully completes 8 years journey in publishing discoveries and current developments in the educational sciences all over the world. Our journal has published all types of works like Research, Review, Short Commentaries, etc.

Journal of Education Sciences Research uses Editorial tracking system for submission of articles and this system helps to monitor and track the articles from the review process to post publication stages. Review process will vary from 14 to 21 days from the day of submission and this peer-review process will be done by the editorial board committee members of the Journal of experts from outside.

Once the editor agrees to handle an article the review comments, revisions/ corrections with respect to the article are reported to the authors in a timely manner. Researchers, scholars, teaching professionals use for reference/cite the articles published in our journal in their work.

Authors with the relevant research fields can submit their work to publishing in our journal. Journal of Educational Sciences Research publishes across the following fields of research but are not limited to "educational sciences, teacher training and field education", it is aimed to publish studies that contribute to the world education system and have international readability.

Educational history, Administration, Management, Policy, Philosophy, theoretical practices, curriculum, Pedagogy, Special education, Virtual education, teacher education, testing and evaluation, learning and teaching methodologies. In the recent years due to covid-19 pandemic we could bring out the virtual methods of learning, teaching practices and the better outcomes made in the virtual era. Better education and skill development are the vital points for the betterment of the society. Irrespective of the countries, socio-economic potential, educational system is organized.

Journal of Educational Sciences Research is a versatile journal which publishes research works/papers from professors, doctors, research scholars, graduates and post graduate stu-

dents to bring out their discoveries and share/spread it to the world.

Journal of Educational Sciences Research is one of the member of the committee on publication ethics (COPE) and adopts the principal ethics. We assure the authors for publishing their prestigious work by following all the publication guidelines and to expel the standards of the journal.

“Ethics Committee Permission” is required for all kinds of research conducted with qualitative or quantitative approaches that require data collection from the participants by using survey, interview, focus group work, observation, experiment and interview techniques. In the articles, it should be stated whether ethical committee permission and/or legal/special permission is required. If it is necessary to obtain these permissions, it should be clearly presented from which institution, on what date and with what decision or number. “Ethics Committee Permission” is required for research in which humans and animals (including material/data) are used for experimental or other scientific purposes.

If the study requires the use of human or animal subjects, international declaration, guide, etc. should be declared appropriate. “Ethics Committee Permission” is required for clinical studies on humans and studies on animals. In accordance with the law on the protection of personal data, “Ethics Committee Permission” is required for retrospective studies. For the use of scales, questionnaires and photographs belonging to others, permission must be obtained from the owners and this should be stated in the article. In case reports, it should be stated that the “Informed Consent Form” was received. It should be stated that copyright regulations are complied with for the intellectual and artistic works used.

- Retrospective ethics committee approval is not required for articles that were published before 2020, produced from postgraduate/doctoral studies (this should be stated in the article), for which an application was made to the journal in the previous year, but accepted but not yet published.
- Non-university researchers can also apply to the Ethics Committees in their regions.
